SUMMARY

Recent Software Engineering Graduate looking for Software Development jobs or internships.

EDUCATION

McGill University - BA Software Engineering Expected Graduation: Nov 2023

Coursework: Algorithms and Data Structures, Object-Oriented Programming, Design Patterns, UML Diagrams, unit testing, Software Systems, Functional Programming, Databases.

The Odin Project - Full Stack JavaScript

Coursework: React.js, Node.js, Express.js, Typescript, Bootstrap, Tailwind CSS

McGill CDSI - Data Science with R Workshop

LightHouse Labs - Web Immersive Prep Course

Projects

Splendor Board Game App

Java, JavaFX, Springboot

Multiplayer game allowing local clients to communicate with the server hosted on Docker. Used M5c's Lobby Service API to implement a lobby service that connects players, and saves unfinished games.

TaskBully iOS App [McHacks10 Devpost](#)

Swift, SwiftUI

Co-developed an award-winning iOS To-Do list application using Swift and SwiftUI. It detects and combats procrastination through personalized push notifications.

HeartBeats watchOS App

Swift, SwiftUI, Apple HealthKit, Spotify API

Collaboratively built a watchOS application that maps the user's live heart rate data to music genres.

WORK EXPERIENCE

Apex Automation Ltd - System Integrator

2023

Worked with both Rockwell Programmable Logic Controllers (PLC) and Delta V Distributed Control Systems (DCS). Helped design and troubleshoot Human Machine Interfaces (HMI).

Lake Louise Ski Resort Accounting Office - Night Auditor

2021

Managed and created multiple spreadsheets, making sure all figures were in balance by the end of day. Handled confidential information for clients and employees including tax and legal documentation.

SKILLS
